***Allowable Subject Matter***

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, more particularly define the structure of an optical waveguide, which comprises of a core guiding layer, a cladding layer, a reflective layer, and a grating layer. The cladding layer has a specific thickness that a ray reflected from the reflective layer is phase matched to an incident ray at the grating layer.

Independent claim 9, more particularly define the structure of an optical waveguide with a core guiding layer, a cladding layer, and a grating layer, wherein the grating has a specific period for coupling light into the waveguide. These particulars, combined with remaining claim elements are not suggested in the prior art. Independent claims 17 and 18 are the method of coupling electromagnetic radiation into such waveguide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
